Some of GAP’s Exciting Programs

6Ts program: Toilets, Trash, Trees, Taps, Tracks & Tigers

- Ganga Action Parivar’s 6T’s program provides a foundation for a cleaner, greener, more sustainable Ganga and environment.
- Through its comprehensive, interlinked programs, we are working to help the people, animals and ecology of the watershed not only survive, but thrive. In so doing, GAP has identified six categories of outreach that are designed to complement each other:
  - Toilets, to provide proper sanitation
  - Trash, to provide solid waste management & recycling
  - Trees, to help clean and restore the environment
  - Taps, to provide clean drinking water
  - Tracks, to “green” one of India’s most vital networks which connects the entire country
  - Tigers, to protect India’s endangered wildlife

National Ganga Rights Act

- Campaigning for the establishment of a National Ganga Rights Act, which will provide by law protection and preservation of Ganga, the National River of India. Just as there are laws to protect other national emblems such as the National Flag, the National Anthem and others, and as Ganga is not only a national emblem but truly a national lifeline, GAP is campaigning for the same protective rights to be given to Ganga, so that she may always flow free and clean, free from exploitation and the abuse of pollution.

YOU CAN HELP!

Donate Your “Time, Talent, Technology, Transparency, Togetherness and Tenacity”!

- Share your ideas with GAP! Help find sustainable, lasting solutions for all the issues facing Ganga and her tributaries - from solid waste management to alternative energy technology, and so much more. All skills, expertise, professions and ideas can help!
- Reach out to friends and family to join the cause! Help educate your family, friends and community to learn about the issues, and inspire them to get involved and be the change.
- Sign the petition to enact the National Ganga Rights Act! Visit www.gangarights.org to add your voice to the cause!
- As Ganga is representative of all waters, work in your own communities to protect local water bodies and the Earth. Bring together your community to plant trees, clean-up trash and do other activities which help restore our rivers and our environment.
- Learn to live “green” every day, and don’t pollute! Use eco-friendly products like cloth bags and reusable water bottles instead of materials like plastic and polythene, try to save water and electricity, reuse and recycle, and always use a trash bin!
- Donate! Donations raised will go towards GAP’s many projects. Adopt a tree, adopt a toilet with GAP’s 6T’s program, or donate specific items for these projects such as trees, building materials, mobiles and more.
